Canada's Leading Life Company

When you consider life assurance, remember these two facts:

The Sun Life of Canada is the premier Canadian Company in all aspects.

Outside of companies issuing "industrial" policies, the Sun Life of Canada does the largest life assurance business in the British Empire.

THE EASIEST WAY.

Speaking of the splendid work being done by the Carnegie Foundation, which recently held its annual meeting in New York, Jacob Gould Schurman, president of Cornell University, said in Ottawa:

"The generosity, the intelligent and unselfish devotion which Mr. Carnegie has shown this philanthropy have won for him the esteem of the whole nation.

"The esteem of one's fellow men—not an easy thing to win; but, as Mr. Carnegie has proven, not so difficult, either, as the sage considered it to be.

"A youth, you know," continued President Schurman, "sought a sage and inquired of him:

"What shall I do, oh sage, to have my fellow men speak well of me?"

"The sage's reply was:

"Die."

FOILING CHRIS.

Columbus had returned to Spain bringing news of wonderful new lands across the sea.

"How much shall I write on it?" queried the maritime reporter of the Cadiz Evening Bulletin, who had brought in the story.

"Don't write anything," replied the editor. "Let Columbus pay for his advertising if he wants any. It's probably a real estate promotion scheme."

"You ought to typewrite your poetry," said the harsh editor.

"Great Scott!" replied Mr. Pen-wiggle. "If I were expert enough to do that kind of typewriting, do you think I'd be putting in my time on poetry?"

PRECAUTIONARY MEASURES TAKEN TO RESTRICT POSSIBLE SPREAD OF DISEASE

Small Chance of Contagion—University Authorities Have Engineering Building Fumigated Again This Morning—Students in Other Faculties Not Affected

STUDENT AFFECTED YESTERDAY SPEEDILY DEALT WITH

Students in First Year Line Up For Vaccination—All Students in Science to be Vaccinated To-day or Monday

Following the outbreak of smallpox discovered on Wednesday, the Science authorities have done everything in their power to discover all traces of the disease. This morning another case was discovered. But it is felt that there is no further danger, as far as the rest of the students are concerned. The authorities are satisfied that the disease will spread no further, and that work will go on as usual, except, of course, in those departments which happen to be minus professors owing to quarantine.

"All students in Science must submit to vaccination."

Such was the tenor of the notice posted in the Engineering Building yesterday afternoon, when it was discovered that another student had contracted smallpox.

The unfortunate youth is A. Murphy, of Ottawa, a first year science student. He had been attending lectures regularly, and was working in the draughting room yesterday morning when Professor Armstrong, who happened his way, discovered that he was quite covered with marks of the disease. Professor Armstrong immediately notified the Health Authorities, and Murphy was detained for thorough examination.

When it was really discovered that he had the disease, then it was that the authorities decided to take every precaution against further outbreak, and, in consequence, issued the order that all students should be examined and vaccinated.

Dr. Ayles, the former Immigration Commissioner at Grosse Isle, was appointed by the University Authorities to proceed to the work of vaccinating all the students. He was assisted by Ted Lennie, of Medicine '14. They were able to vaccinate about one hundred students during the course of the afternoon. The several hundred students who have yet to submit to the ordeal will have to submit to vaccination either this morning or on Monday.

Dean Adams stated to the Daily last night that the various rooms in which the afflicted student had been during the course of yesterday morning would be thoroughly fumigated this morning. It was not felt necessary that the rest of the building should again be fumigated, as this had been done the night before.

Lectures in the various departments will be continued as usual. Some of the work, however, will be somewhat disorganized owing to the fact that three members of the Electrical Engineering staff were in residence at the Knights of the Round Table House where the first man to contract the disease was residing.

WATER FLOWS IN ARTS' BUILDING

Consternation was supreme among the professors of the Arts faculty yesterday, when they entered the faculty room. Instead of a clean and tidy room as usual, they walked into a room which was full of water, and which could not be used. This was all caused by the breaking of one of the coils in room 109 early Friday morning, and the water which flowed from it, pushed through the ceiling, into the faculty room, and then, not content with this damage, it kept its course down to the rooms, in which Frankie, the janitor, slept.

The covering of the faculty room table was absolutely destroyed, and was immediately taken off by Frankie and his glib assistants. Then, the walks on the north side of the room were so wet, that the profs. were unable to hang up their coats on that side of the room. The water on the floor was soaked up as soon as possible, and then given a washing.

In the janitor's room, the beds were destroyed beyond further use, thus necessitating Frankie's removal early in the morning. Other articles in the janitor's room were also damaged, and when seen by the Daily yesterday, Frankie stated that the damage would reach about one hundred dollars.

The break in the coil was caused by freezing, and if everything keeps normal, the coil will probably be fixed this morning.

UNION DANCE IS CANCELLED

Necessary Owing to Outbreak of Smallpox

MONEY RETURNED

Busy Scene in Council Office—Union and Alma Mater May Be Joint Affair

The Union Dance, which was to have taken place last night, has been cancelled.

Acting upon the advice of Principal Peterson and Professor Starkey, of Medicine, the president of the Union, Jack Hall, decided to call the dance off.

It was felt that there might be some danger in allowing the dance to be held, owing to the recent outbreak of smallpox in the precincts of the University.

The Council office presented a busy scene all yesterday afternoon. The patronesses were informed, all the buildings were notified, and notices posted to the effect that the dance would not be held. The various fraternities around college were also informed. Notices were placed on the campus and outside the Union.

A steady stream of students kept invading the Students' Council office all afternoon seeking a refund of the price of admission.

When asked whether the Union would likely lose much owing to the cancellation of the dance, the secretary of the Students' Council stated that the net loss would be in the vicinity of \$200.

The caterer had made all preparations for the function. His bill would likely be quite large. Then there is an item of \$50 for printing. Over and above this total the Orchestra which had been engaged may put in a claim for something.

Though the Union Dance will not be held as such, the Council have offered to amalgamate the Alma Mater and the Union dances. Whether this will be taken up, yet to be said. The matter will be taken up at the next meeting of the Council.

WHO FIDDLER WITH FIRE APPARATUS?

After the dinner-time lecture in the faculty of Arts, certain freshmen, after a stirring and interesting lecture on "Chaucer," decided to practice fire extinguishing—they succeeded.

Then there arose a dispute as to who should take the initiative in the public works. After a short quarrel, which ensued, one desperate fellow decided upon action, and not speech. He at once seized the mysterious patent known as a "Fire Extinguisher." Unfortunately he caught it the wrong way, and it went off too soon.

The poor fellow was astounded at the way in which he was drubbed. Many coats and hats which were hanging nearby suffered from the over-anxiousness of the young student. Soon there appeared on the scene as many men as were in the Arts building, and they proceeded to form a plan by which the offender might remember his rash deed. Luckily he escaped before anything of that nature was completed.

Some cool-headed men thought of attracting the attention of Frank, who they knew, would put an end to the proceedings. The latter, with his usual promptness, scattered the crowd and cleared the chemical out of harm's way.

Those who were affected thought that the strong mixture would burn holes through or at least seriously damage their clothing. Such, however, was not the case.

MANY ARE TREATED AT R. V. H.

Royal Victoria Hospital was besieged yesterday afternoon by many science students who had not been vaccinated in the Engineering Building.

Dr. McKay, the admitting officer, who is himself a graduate of McGill, administered the cow-pox.

At one time in the afternoon there was keen competition for "next" in the line of students waiting to be attended to.

It is expected that to-day and Monday many other students will go up to the hospital to be treated. Many of them will be Arts students.

PATIENTS IN FOR ABOUT TEN DAYS

"He's not very seriously ill," said the officer of the Isolation Hospital last night, in reply to the Daily's query about the condition of Murphy.

"How long will he likely be there?"

"Oh, about ten days."

"And Mr. Mathers?"

"Probably the same time."

THOSE ARMS ARE CERTAINLY TENDER TO-DAY

"Don't touch that arm!—Can't shake to-day, old top!" "Gee Williker, steer clear there, can't you?"

These were common expressions around the campus yesterday afternoon. At the Union dining room and at the boarding house dinner table if you hit a man on the broad of the back, all right. But try to do anything with his left arm, and the remarks would attract remarks from all round.

For the Science freshmen and sophomores were vaccinated yesterday, and they now carry their left arms in a tender kind of fashion. They were remarkably good humored about it yesterday, but it is expected that this afternoon, with arms double size, lugubrious aspects and woe-begone "lost forever" way of going about things will bespeak with many a sorry state of affairs.

Of course those who feel worst about it have the right to feel the best. If the vaccine properly takes effect, then your arm swells up. It ought, really, to be round, and red, and festered.

One of the Science Freshmen, who had not undergone the experience in his memory before, described his experience of being vaccinated, as he remembered it.

"Nobody need be afraid," he said. "All they do is this: 'They just take your arm, and the doctor puts his hand around underneath it, and gathers a bunch of flesh over the muscle of the forearm. He has a kind of quill there (I don't know what it is made of, but it is a kind of red), and I shouldn't wonder if it was ivory), and scratches your arm until the blood comes.

"Then he smears the cow-pox over where the blood came from."

According to the freshman the doctor gave two extra jabs into his flesh that he didn't like.

ASSOCIATION OF RAILWAY GRADUATES MEETING TO-NIGHT

T. M. Hamer Will Speak on Recent Railroadings and Mexico

To-night, the regular February meeting of the Association of Railway Graduates comes off in Room 35, Engineering Building, at 7.30 sharp.

Mr. T. M. Hamer, graduate of Science '13, has prepared a very interesting paper on "Recent Railroadings and Mexico," which he will read before the Association. This will certainly be a very interesting paper, and Mr. Hamer is well qualified to handle the subject, as he has a first hand knowledge of the situation. Mexico indeed, has had some exciting times of late, and the story of how the railroads have kept operating in spite of the bickerings, will probably not only be highly instructive, but also very amusing.

The Canadian Pacific Apprenticeship course will also be discussed in detail. Already circulars describing exactly what is to come up, and how it is to be prevented, have been sent to nearly everybody interested, and some important changes will probably be made.

The trackwork item will no doubt excite keen attention. It has been proposed to cut this period down and place some car work to cover the remainder. This and other proposals in regard to the University course, and the work in general will be thoroughly thrashed out before definite action takes place.

Although this Association is comparatively young, it has prospered exceedingly, and one fact which shows how keen the men are about the work is that a number of them are making special trips to Montreal in order to be present.

The undergraduates who are in any way interested in these subjects above-mentioned, are cordially invited to be present, and take a part in the business of the meeting.

expense from one of the Montreal dailies, has compiled a series of advisory advices from recent visitors to Drs. Ayles, Mackay, or Ted Lennie.

"Don't go to the M. A. A. this afternoon with affectionate motives," he urges, "if she presses too closely to you or the side where the vaccine is taking effect, don't say what you would like to say."

"Sleep on the small of your back, or on your right side."

"Beyond all don't go swimming for a few days. If water gets in to the left arm blisters or swelling is likely to result."

"Don't go to a dance for three days, after that go to one with one arm if a sling."

TRY THIS.

"No, George, I am afraid I cannot marry you. I want a man who possesses a noble ambition; whose heart is set on attaining some high and worthy object."

He: "Well, don't I want you?" She: "Oh, George! I am yours!" "Ladies' Home Journal."

A LA MODE.

"My wife is always complaining she has nothing to wear."

"Great Scott, fellow! What on earth is she kicking about? Get to her quick and tell her she's right in style and doesn't know it."—St. Louis "Republic."

THE ROYAL MILITARY COLLEGE OF CANADA

There are few national institutions of more value and interest to the country than the Royal Military College of Canada. Notwithstanding this, its object and the work it is accomplishing are not sufficiently understood by the general public.

The College is a Government institution, designed primarily for the purpose of giving instruction in all branches of military science to cadets and officers of the Canadian Militia. In fact, it corresponds to Woolwich and Sandhurst.

The Commandant and military instructors are all officers on the active list of the Imperial army, lent for the purpose, and there is in addition a complete staff of professors for the civil subjects which form such an important part of the College course. Medical attendance is also provided.

Whilst the College is organized on a strictly military basis the cadets receive a practical and scientific training in subjects essential to a sound modern education.

The course includes a thorough grounding in Mathematics, Civil Engineering, Surveying, Physics, Chemistry, French and English.

The strict discipline maintained at the College is one of the most valuable features of the course, and, in addition, the constant practice of gymnastics, drills and outdoor exercises of all kinds, ensures health and excellent physical condition.

Commissions in all branches of the Imperial service and Canadian Permanent Force are offered annually.

The diploma of graduation is considered by the authorities conducting the examination for Dominion Land Surveyor to be equivalent to a university degree, and by the Regulations of the Law Society of Ontario, it obtains the same exemptions as a B.A. degree.

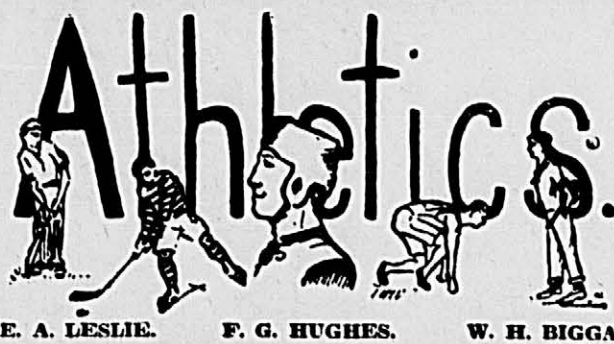

The length of the course is three years, in three terms of six months each.

The total cost of the course, including board, uniform, instructional material, and all extras, is about \$300.

The annual competitive examination for admission to the College, takes place in May of each year, at the headquarters of the several military districts.

For full particulars regarding this examination and for any other information, application should be made to the Secretary of the Military Council, Ottawa, Ont., or to the Commandant, Royal Military College, Kingston, Ont.

240-4242-4244-4246-4248-4250-4252-4254-4256-4258-4260-4262-4264-4266-4268-4270-4272-4274-4276-4278-4280-4282-4284-4286-4288-4290-4292-4294-4296-4298-4300-4302-4304-4306-4308-43

E. A. LESLIE. F. G. HUGHES. W. H. BIGGAR.

JUNIOR LINE-UP.

The following Juniors are requested to be on hand at 11:30 sharp, on the Campus rink, to meet Arts '16: Clarke, Oliver, O'Halloran, Rivard, Fraser, Gibb, Cushing, C. W. Ross and Upham.

DARTMOUTH ATHLETES CHOSEN FOR MEET

Ten Men to Represent Hanoverians in B. A. A. Meet To-Night

Hanover, N.H.—Coach H. L. Hillman has picked the athletes who will represent Dartmouth in the B. A. A. games this evening. For the shot put Coach Hillman has decided to send only L. A. Whitney, who is rounding into his Olympic form, and can be expected to do better than 45 feet. Braun, the former Newark star, will be entered in the hurdles with Trenholm, a freshman. Legay, another freshman of promise, will be entered in the middle distance runs, and Coakley, the former Powder Point star, probably will be entered in the dash. The 320-yard relay team, which will consist of M. L. T. will have Captain O'Connor, Braun, and Llewellyn. The half-mile team, which will meet Pennsylvania, has two veterans, Marceau and Granger, from last year's championship team, and Hillman will rely on Riley, the former Lawrence star, and Tucker, a new man, to make up the quartette.

NEW METHODS FOR GYM. INAUGURATED AT COLUMBIA

Rowing on Machines, Track Work, Swimming, Wrestling and Handball Replace Former Drills

Yesterday the new arrangements of the Physical Education Department at Columbia went into effect. From all reports it bids fair to be a great success. The plan is simply to change the old time calisthenic work for athletic work. Each man will have to do some sort of work, but the specific nature of it is optional with himself. He can row on the machines, run on the track, swim, wrestle, in a word he can do his stunt along the line that pleases him most. Instead of the former unpleasant drills. The idea is to get every man interested in some line of athletic work, and have him pursue it not only during the two hours of compulsory work a week, but of his own accord in the leisure moments. It is also hoped that this system will bring out the various teams a great many more men than are at present candidates. Furthermore it will get men in the habit of exercising regularly, a habit, which they will continue after they have left college.

The experiment was tried yesterday afternoon for the first time. Coach Rice who has offered four afternoons a week to drill the men in rowing had a large-sized "awkward squad" on the machines yesterday. Coach Kennedy,

IN A FAST OVERTIME GAME MCGILL LOSES TO HUNTINGDON

Hard Checking—Slashing—Nicholson, Williamson and Morris Star for Visitors

Huntingdon, Feb. 6.—In a fast overtime game, Huntingdon won from McGill Juniors with a score of 6 to 5 here to-night. The game was characterized by hard checking and considerable slashing as well as much fast work on both sides.

The penalties were Huntingdon seven and McGill six. Nicholson, Williamson and Morris starred for McGill, whereas on the Huntingdon line Burrows and Kelly did the preying work. Huntingdon put up a better exhibition of hard checking and were easily first as far as skating is concerned. Burrows, of the Huntingdon team, was the fastest man on the ice.

The first half showed little combination on either side. McGill got the lead on play and points. Half-time score: McGill, 4; Huntingdon, 3.

In the second half, Clarke, of McGill, stops many hot ones. Huntingdon ties fifth goal with 30 seconds to go. Full time score: McGill, 6; Huntingdon, 5.

In ten minutes' overtime play Huntingdon start things and rough work ensues on their part. McGill press hard but fail to find the nets.

HARVARD BASEBALL PLAN TO PRACTICE

Battery Candidates Have Been Doing Gym Work—New Men Will Be Developed

Next week will find the candidates for the Harvard varsity baseball nine reporting to Coach F. J. Sexton and Capt. D. J. P. Wingate, '15, for the first real practice work of the year. Battery candidates have been doing some gymnastic work for about three weeks under the watchful eye of the head coach, that they might be in the best of shape to take up the more serious part of the training with the reporting of the rest of the candidates.

There is but one part of the Harvard varsity nine of 1914 that promises to give Coach Sexton much trouble, and that is the battery positions. Last year Harvard was none too strong in the way of catchers and pitchers, and it looks now as if it would be necessary to develop some entirely new men for this summer.

INTERMEDIATE CHAMPIONSHIP.

The Royal Military College senior hockey team will now meet McGill Seconds in the Intermediate Intercollegiate series, having won its round with Queen's seconds. The date of the game has not yet been settled upon. The cadets won their round by a total of 9 to 2. In the second game of the series they beat the Queen's men 7 to 3, while last week they tied them 2 to 2.

VARSITY WILL BATTLE QUEENS

These Two Teams Will Meet For First Time This Season

HARD FAST ICE

Game Should Be Close and Result Will Be All Important

This afternoon at Toronto Arena, Queens and Varsity will meet in their first clash of the season. The game in Kingston, which should have come off last Friday night, had to be postponed on account of the mild weather and the consequent condition of the ice.

The match in Toronto should go a long way towards clearing away the clouds which have been hanging over the ultimate resting point of the championship.

Both teams have defeated McGill, one at home and one away from home. Should Queens defeat the Torontonians, then with but two home games they should be easy winners. On the other hand, if Toronto wins they still have two games away from home which would try the merits of the team pretty high the breaking point.

There is very little upon which to forecast the result of today's encounter. The ice will be of the best. With an artificial freezing plant and the cold weather which has settled over both Montreal and Toronto during the last few days, this great essential may well be excluded from giving any advantage to either side. Both teams are fast and hard ice will please them. The game should be one of the fastest yet. With Dobson and Box on the tricolor's forward line, Laird in goal, and the other hand, if Toronto wins they still have two games away from home which would try the merits of the team pretty high the breaking point.

There is very little upon which to forecast the result of today's encounter. The ice will be of the best. With an artificial freezing plant and the cold weather which has settled over both Montreal and Toronto during the last few days, this great essential may well be excluded from giving any advantage to either side. Both teams are fast and hard ice will please them. The game should be one of the fastest yet. With Dobson and Box on the tricolor's forward line, Laird in goal, and the other hand, if Toronto wins they still have two games away from home which would try the merits of the team pretty high the breaking point.

The Juniors will leave their chances in the hands of a team picked from Clarke, Oliver, O'Halloran, Rivard, Fraser, Cushing, C. W. Ross and Upham. The freshmen will put up a good argument.

The freshmen will line up as follows: Goal, Keir; point, Heron; cover point, Martin; rover, Galvin; centre, Ritchie; right wing, MacDermot; left wing, Harrower.

UPS AND DOWNS. Miss Belle de Costa Green, the \$10,000 librarian of the Morgan collection, was talking in New York about her campaign in behalf of her underpaid sister librarians.

"Women are to blame in a way," she said, "for the underpayment that prevails among them. They must change their attitude."

"Women in the past pretended to be helpless and clinging in order to flatter men."

"Women thought that by allowing men to look down on her he would look up to her."

Harold (continuing to pull the cat's tail)—"What did you say, mother?" (She says it again)—Punch.

TWO GAMES.

Two inter-class games are on the slate for this morning. Arts '17 will play Arts '14 at 10 o'clock, and Arts '16 are to meet Arts '13 at 12 o'clock. All men are requested to be on hand on time, so that the games may be run off promptly.

HARVARD BASEBALL PLAN TO PRACTICE

Battery Candidates Have Been Doing Gym Work—New Men Will Be Developed

Next week will find the candidates for the Harvard varsity baseball nine reporting to Coach F. J. Sexton and Capt. D. J. P. Wingate, '15, for the first real practice work of the year. Battery candidates have been doing some gymnastic work for about three weeks under the watchful eye of the head coach, that they might be in the best of shape to take up the more serious part of the training with the reporting of the rest of the candidates.

PENNSYLVANIA LOSES BADLY IN THEIR BASKETBALL FIXTURES

Lost Three Games in Past Week, Through Injuries to Players, Including Captain

During the past eight days the Varsity basketball team has lost three games. This record was not unexpected, as in none of the games played did Pennsylvania present its regular line-up. Injuries to members of the team are alone responsible for the record. The team has experienced in a number of years. Princeton, Wesleyan and Dartmouth each had a win registered to their credit at the expense of the Varsity.

More serious than the loss of the three games was the collapse of Captain Seelbach in the Dartmouth game. For over a week he has been confined to his bed by a physical breakdown. As a result he lost much weight, and Dr. Hancock only at the last moment decided to let him take the New England trip. He complained of feeling ill before the game at Hanover, but stoically took his place at the start of the contest. He completed one half, and at the start of the second he dropped exhausted and had to be carried to the dressing room.

It was the lack of Captain Seelbach which lost Pennsylvania the Princeton game. He was not able to get out on the floor at all at that game, and as a result the teamwork of the Varsity five was weakened fifty per cent. For its whole system of play is built around the big centre. His loss was also felt in the foul shooting, where inexperience caused Heindel and Freed to lose most of the chances.

The Varsity five took the lead at the very start, but soon relinquished it to the Hanoverians. Although unable to break up the team play, they displayed good work in blocking the shots. Their skill in this department kept the score down. The half ended 11 to 5, Dartmouth leading.

Coach Klefberger changed the line-up at the start of the second half, and this evidently put new life in the five. Freed took Williams' place at forward, and Wallace displaced Hardwick at guard. Heindel at guard, Seelbach at centre, and Bloom at guard retained their places. This line-up was again changed when Seelbach collapsed a minute after play was resumed. Bloom was moved to centre, Freed to guard and Bullitt was sent in to fill the vacancy at forward.

It was in the second half that the Varsity outplayed Dartmouth, scoring eight points to the latter's seven. The team tried hard to overcome the lead, but this proved too great, and the game ended 18-13.

For Pennsylvania, Bloom's playing was the redeeming feature of the contest. The line-up:

Pennsylvania. Dartmouth. Seelbach forward Snow Williams forward Winslow Seelbach centre Young Bloom guard Rector Hardwick guard Loudon

R.V.C. WILL UPHOLD HONOR

Four Games Will Be Played This Afternoon in Victoria School

ROOTERS CLUB

Basketball Matches Should Be Well Contested—Practice Has Improved Teams

Four matches in all are scheduled to be run off in the gymnasium of Victoria School this afternoon. These matches will show up the shining powers of the R. V. C. athletic representatives. The order in which the games will be run off has not been decided, but the following matches will be played:

First Team R. V. C. vs R. V. C. Alumni. Second Team R. V. C. vs Old Teckes. First Team Macdonald vs First Team Teachers. Second Team Macdonald vs Second Team Teachers.

Hard practice has put the R. V. C. in a good line for a series of wins. Encouraged as they will be by the Rooters' Club, which is to attend in force, they will have all the advantages with them. Speaking of the Rooters' Club, this body has made special preparations for this afternoon. They have arranged some new songs, and cheers, and will no doubt help the team considerably by giving their yells at the critical moments.

The line-up of the R. V. C. teams will be:

R. V. C. FIRST TEAM. Baskets—G. Ryan and C. Fritz. Centres—G. Rogers and M. Bennett. Guards—V. Henry and E. Chauvin. R. V. C. SECOND TEAM. Baskets—F. Kilgour and C. Morgan. Centres—J. Macdonald and G. Macdonald. Guards—G. Story and M. Spier. Referee—Miss Robert. Miss Cartwright, Miss Roberts and Miss MacCallum.

DEPARTMENT OF MINES GEOLOGICAL SURVEY.

PUBLICATIONS

The Geological Survey has published maps and reports dealing with a large part of Canada, with many local areas and special subjects.

A catalogue of publications will be sent free to any applicant. Most of the older reports are out of print, but they may usually be found in public libraries, libraries of the Canadian Mining Institute, etc.

REPORTS RECENTLY ISSUED:

- CANADA
1065. Descriptive Sketch of the Geology and Economic Minerals of Canada. Accompanied by a geological and mineral map of Canada, by G. A. Young and R. W. Brock.
NEW BRUNSWICK AND NOVA SCOTIA
1165. Memoir No. 18. Bathurst District. New Brunswick, by G. A. Young. Maps not yet published.
QUEBEC
1186. Memoir No. 35. Reconnaissance along the National Transcontinental Railway in Southern Quebec, by John A. Dwyer.
ONTARIO
1160. Memoir No. 17. Larder Lake District, Ont., and Adjoining Portions of Pontiac County, Quebec, by Morley E. Wilson.
1242. Memoir 33. Geology of Gowganda Mining Division, by W. H. Collins.
NORTH WEST PROVINCES
1204. Memoir No. 24. Preliminary Report on the Clay and Shale Deposits of the Western Provinces, by Heinrich Ries and Joseph Keeler.
1290. Memoir 29. Oil and gas prospects of the Northwest Provinces of Canada, by Wyatt Malcolm. Map not yet published.
BRITISH COLUMBIA
1116. Memoir No. 21. The Geology and Ore Deposits of Phoenix, Boundary District, B.C., by O. E. LeRoy.
YUKON AND NORTH WEST TERRITORIES
1238. Memoir No. 31. Wheaton District. Yukon Territory, by D. D. Cairnes. Maps not yet published.

MAPS RECENTLY ISSUED:

- CANADA
1042. Mineral Map of Canada. Scale 100 miles to 1 inch.
1271. Map 91A. Geological map of the Dominion of Canada and Newfoundland. Scale 100 miles to 1 inch.
NOVA SCOTIA
1103. Map 13A. Kingsport sheet, Nova Scotia. No. 84. Scale 1 mile to 1 inch.
1258. Map 53A. Southeast Nova Scotia. Scale 4 miles to 1 inch.
NEW BRUNSWICK
1181. Map 33A. Reconnaissance Map of Parts of Albert and Westmoreland Counties, N.B. Geology and topography. Scale 1 mile to 1 inch.
QUEBEC
1178. Map 32A. Larder Lake and Opasatika Lake. Nipissing, Abitibi and Pontiac, Ontario and Quebec. Geological. Scale 2 miles to 1 inch.
ONTARIO
1260. Grenville Sheet. Parts of Counties of Ottawa, Argenteuil, Terrebonne, Two Mountains and Vaudreuil, Quebec and Carleton, Russell, Prescott and Glengarry, Ontario. Geology. Scale 4 miles to 1 inch. Reprint.
1171. Map 31A. Larder Lake, Nipissing District, Ontario. Geology. Scale 1 mile to 1 inch.
1244. Map 64A. Advance geological copy of map of Gowganda Mining Division and vicinity. Scale 1 mile to 1 inch.
ALBERTA
1182. Map No. 7A. Bighorn Coal Area, Alberta, by G. Malloch. Scale 5 miles to 1 inch.
BRITISH COLUMBIA
1260-1276. Maps 74A-90A. Geology of the Forty-ninth Parallel. Geology and topography of the International Boundary between British Columbia and the United States. Scale 1 mile to 1 inch, contour interval 100 feet.
1237. Map 62A. Nelson and vicinity, British Columbia. Geology and topography. Scale 1 mile to 1 inch.
YUKON AND NORTH WEST TERRITORIES
1089. Map 3A. Explored Routes on parts of the Albany, Severn and Winkie River a. Scale 8 miles to 1 inch.
NOTE—Maps published within the last two years may be had, printed on linen, for field use. A charge of ten cents is made for maps on linen.

One Dollar Thirty Five Profits an Hour

were made by the average salesmen in Canada for every hour worked selling "WAZ-ER" aluminum cooking utensils during summer of 1913. College expenses paid, business experience gained, opportunity for travel. Write Northern Aluminum Co., Limited, Sterling Road, Toronto.

For the past month the aspirants for the Varsity battery have been practicing regularly in the gymnasium, but during last week Coach Thomas had the pitchers and catchers on Franklin Field. The twirlers are rapidly rounding into shape.

The loss of Captain Seelbach from the line-up of the basketball team has been one of the causes for the disastrous slump which the five has just experienced. The injuries to players is largely responsible for the defeats at the hands of Princeton, Wesleyan and Dartmouth. In none of these games did Pennsylvania have her regular line-up on the floor and for this reason the team work is demoralized.

AT HOME AND ABROAD

Three of the four members of the University of Pennsylvania, two-mile relay team that will race Dartmouth at the Boston Athletic Association games were chosen Tuesday. They are Meredith, Kelly and Cross.

Further trial heats will be held between Bacon and Church to decide who shall be the fourth member of the team.

Pennsylvania will be well represented in the Middle Atlantic A. U. Swimming Championships, to be held at the Germantown Boys' Club to-day, as Captain Overacker expects to enter two teams in the 100-yard relay and 500-yard relay, and will also enter men in the 50-yards championship and the

BASEBALL TRAINING AT PENNSYLVANIA

Players Now Practising in Gym., But Will Soon Turn Out Regularly on Franklin Field

On Monday the initial call for candidates for Varsity and Freshman baseball teams at Pennsylvania was issued by the coaches. The men reported at the gymnasium, but as soon as the weather will permit they will hold their practice on Franklin Field.

VACCINATE!

That the University is in no danger from the fact that two cases of smallpox have been discovered is certain. Steps have been taken to safeguard the health of the student body. In this the authorities have shown their wisdom.

We would suggest that those of the students who are in any way run down should see to it that they are duly vaccinated. This is a measure of precaution which all should take not only in their own interest but in the interest of the health of others with whom they come in contact.

We feel safe in predicting that there will be no epidemic in our midst. The origin of the cases that have already developed seems to warrant such a conclusion. But there is evidently a wave of the disease threatening the city.

For this reason we would urge upon the students the necessity of exercising care in the matter of selecting pleasure resorts and other rendezvous, for a time at least.

The effect of any serious outbreak in the University community would be appalling. It will be wise under the circumstances to bear in mind the adage, "An ounce of prevention is worth a pound of cure."

EDITORIAL NOTE

There are 24,527 publications in the United States and Canada, 2640 being dailies; and they are printed in forty languages. These figures should go far toward convincing the casual reader that every effort made to bring about the elevation and standardization of the press of the two nations should be encouraged, in the interest of clearer and cleaner public thought.

Coins are known to circulate on an average about twenty-seven years, so it often happens that the first dollar one ever earned comes back again. It looks so much smaller than it did originally, however, that it is seldom or never identified.

McGill Twenty-Four Months Ago

FROM THE MCGILL DAILY, WEDNESDAY, FEBRUARY 7, 1912.

McGill graduate in Medicine dies in the distant Rhodesia after a distinguished career, having done much to civilize both India and Africa. The late Dr. J. M. Hayman, while an undergraduate of the faculty of Comparative Medicine, earned the reputation of a precocious and assiduous student. Dr. Duncan McEachran, former Dean of the Faculty, took a particular interest in Dr. Hayman as a student and he is no way surprised at the great success which has eminently marked his career. It is interesting to note Dr. Hayman was the son of the late Dr. Hayman, a headmaster of Rugby.

Dr. Barlow presents Gold-Bearing Quartz to the Mineralogical Museum. McGill is once more the recipient of a princely gift. This time it is Dr. Barlow, the popular seasonal lecturer on ore deposits in the Department of Mining Engineering who presents to the Museum of that department a specimen of gold bearing quartz taken from Hollinger Mines.

The final debate for the Intercollegiate Debating Championship will take place at McGill on Friday evening, February 23rd. Queens and McGill will fight out the question, "Resolved, that Home Rule with Representation at Westminster should be granted to Ireland." Queens had choice of side and took the affirmative.

The Medical Society will hold its meeting on Monday evening in the Medical Building. It will be worth the time of every medical undergraduate to attend, if only to hear the address of Dr. Chas. Martin. Mr. F. S. Swain, 12, has of late been too busily engaged to have his paper ready for publication, and a case for diagnosis will be substituted.

On Monday afternoon the McGill Canadian Club had the distinct privilege of listening to Mr. Ewart, the well-known writer and controversialist on national and imperial topics. Mr. J. S. Ewart is a barrister of Ottawa.

ROUND ABOUT THE COLLEGE

TO WHICH EVERYBODY IS A REPORTER.

Mr. Merlin Davies, of the McGill Conservatorium of Music, who is well known as one of the leading tenor singers of Montreal, has been asked to sing at Valleyfield at the annual St. Patrick's Day celebration on March 17. Mr. Davies will also act as musical adjudicator at the Utica, New York State, annual musical festival, to be held on March 24 and 25.

Dean Adams, of the Faculty of Applied Science, left for Quebec last night. While there he will deliver two public lectures, one on "Pompeii," and the other on "Palestine." He will return on Monday.

Members of the St. James Literary Society listened Thursday night to an amusing lecture on "Mr. Punch and His Round Table," by the Rev. Prof. Welsh.

The ice on the campus rink yesterday afternoon showed a vast improvement over what it had been the day before. The frequent waves had almost disappeared.

"Some Pathological Conditions of Montreal" will be the subject of an address which Dr. J. G. Adams will deliver, under the auspices of the Knights of Columbus Debating Club, Sunday afternoon, at 4.30, at the rooms of Canada Council, 255 Mountain st.

The Faculty member of the Pennsylvania Punch Bowl just to hand contains a frontpiece cartoon of Dr. R. Tait McKenzie, done by Mr. "Oit" Anderson, a well-known New York cartoonist. It represents the well known professor in the attitude of a sculptor, with mallet and drill, carving his own image.

R. B. BENNET SECURED TO ADDRESS UNDERGRADS ON MONDAY AFTERNOON

One of the Leaders of the Conservative Party to Speak Here—"The Western Whirlwind"

On Monday afternoon, at 5 o'clock, at Strathcona Hall, a public meeting under the auspices of the McGill Conservative Club will be held, when an address will be delivered by Mr. R. B. Bennett, K.C., M.P., for Calgary.

There is no more brilliant man in Canadian public life than Mr. Bennett, who is fast becoming one of the leaders in our political arena. After acting as leader of the Opposition in the Alberta Legislature for two years, he was elected to Ottawa for Calgary in 1911, by a majority of over two thousand, in the Liberal province of Alberta.

His slashing style of platform oratory has made him known as the "Western Whirlwind."

As a Parliamentary debater, Mr. Bennett is a foe worthy of any man's steel, while as a campaign orator of the fighting type, it is even doubtful if he has an equal in the Dominion.

The Conservatives say they are confident of overthrowing Premier Mathewson's government on Tuesday evening. Mr. Bennett will inspire the ranks of the party with just that fighting spirit that is necessary to every student, Conservative, Liberal, Socialist or Anarchist, is invited to be present at Strathcona Hall on Monday at 5 o'clock.

Ottawa Power Houses Are Inspected By McGill Boys

Fine Overnight Trip to Capital City Taken by Electricals—Power Carried Beneath Streets—Hydro-Electric Power Plant Connected With Chaudiere Falls

For some time past it has been the custom of the Electric Club of McGill University to visit different power houses in order to get a clearer idea of station lay-out. The first trip of the year was made during the week. A special car was attached to the train which left for Ottawa on Wednesday night, and the McGill yell informed the populace of the reason.

The students occupied the car during the night, and on Thursday, accompanied by Dr. Herdt, Prof. Gray and Mr. Burr, of the Electrical Engineering staff, they visited the hydro-electric developments of the Chaudiere falls, in the Ottawa river, and the Slater street sub-station. This station is the distributing centre of the Ottawa Electric Co. and is fed from power houses Nos. 1, 2 and 3, and the system presents the more modern methods of station switching equipment, and lay-out.

DR. HERDT DESIGNS.

It was designed by Dr. Herdt. Mr. Burr, has also been working on the design for a number of years.

Power house No. 2 contains three units of 1,500 K.V.A. at 2,300 volts, and has space for a fourth. The generators are direct connected to water turbines, operating under a head of 32 feet. This station has been chosen as the central point of the three. It is equipped with a new electrically operated circuit breaker structure, with a control panel-type switch board. Two of the 1,500 K.V.A. machines are connected through mechanically operated switches to a bus bar, which is in turn connected by an electrically operated switch to this special structure, making a switching unit of 3,000 K.V.A. The leads from power stations Nos. 1 and 3, with certain other tie lines are also connected to these bus bars. No. 1 is the old hydro-electric power house, with a capacity of 3,000 K.V.A. at 2,300 volts, and No. 3 contains two turbo-generator sets with a capacity of 6,000 K.V.A. The Westinghouse Parsons steam turbines are direct connected to the generators, and operate at 1,200 K.P.M. This station forms the reserve which the constancy of modern service demands. The boiler that always under steam, but the station is used only in the case of break-down or fall of water in the river.

TRANSFORMED FOR DISTRIBUTION.

In station No. 2 the power is transformed from 2,300 to 12,000 volts in order to be transmitted to the sub-station in the centre of the city. The

distance is only a mile and a half, yet the saving in copper and power loss more than repays the cost of the extra installation. This has been made possible by the reduction in the price of transformers. The power is transmitted underground, and the switching is so arranged that any circuit may be operated separately.

The sub-station contains three banks of transformers, and the power is stepped down again to 2,300 volts. These transformers are water-cooled, and after passing through the transformer, the water enters a tank from which it is pumped to the top of a cooling tower. The tanks contain enough water for a week. The only loss is that due to evaporation, and the cost of cooling is reduced to less than one-sixth of what it would otherwise be. The station also contains two motor generator sets, which supply direct current at 550 volts. All outgoing lines are underground as well.

OTTAWA-HULL POWER CO.

The party also visited the old Ottawa-Hull power house, which generates both two and three phase, the latter at 11,000 volts. The new power house, which is in course of erection, was also visited. The wheels in this plant will probably be the largest four runner horizontal wheels that have been constructed.

The power house pulp mill and match factory, of the E. B. Eddy Co., were also visited.

The members of the party were the guests of Dr. Herdt for luncheon at the Laurentian Club. Mr. A. A. Dion, general superintendent of the Ottawa Electric Co., was also present.

NEVER LIKE THIS.

The trip was much enjoyed by all, and one of the number was merely expressing the opinion of others, when after the luncheon he declared, "Montreal was never like this, and the tickets are good for a month."

The call of the eighth attendance rule, however, proved effective for most of the boys were able to report for duty Friday morning, a fact worthy of commendation, considering the number of incidents, amusing and otherwise, which occurred during their stay in the capital city. There are too numerous to mention, and need not be recorded to be remembered.

Due to the members of the staff and the courtesy of the managers of the different companies, the trip was a great success, and will long be remembered as an instructive and enjoyable one.

THINGS THEATRICAL

CECILIA LOFTUS, IN "A LADY OF QUALITY" AT THE STRAND. Three Days Commencing Monday, February 9.

The first of the Famous Players Film Company's reproductions to be released in 1914, and shown at the day, the 5th, is Cecilia Loftus, the Strand three days commencing Monday. Famous characters, who are the stars of the novel and play, "A Lady of Quality," in five reels by Frances Hodgson Burnett. The subject is an idyllic blending of the romance, beauty and daring of the days of knight-hood, and the film version has developed into a brilliant production of the warmth and color of a picturesque period.

Cecilia Loftus, who, during her stage career, has enacted many difficult characterizations, infuses into the role of Florinda, the headstrong, tempestuous hoyden, who is the heroine of the tale, a degree of charm and sentiment that is at once rare and delightful. Throughout her strange and fascinating career, Miss Loftus invests Florinda with a dash and vivacity, a naturalness and artistry difficult to imagine and impossible to resist. This famous actress played at the Princess with William Faversham no less than

MISS MABEL HACKNEY.

Although Miss Mabel Hackney is known to her many admirers as one of the most charming and gifted actresses of her day, it is realized by few that in addition to this she is also an athlete of no mean order, having twice entered and competed

in the Long Distance Swim in the Thames from Teddington to London Bridge, adopting for this purpose the unassuming pseudonym of Smith. Her husband, Mr. Laurence Irving, was himself unaware that his wife indulged in this amazing-like pursuit until he made the discovery one day in the following manner. Strolling along the

TRADE **Gillette** MARK

Never apologize for needing a shave—get a Gillette and have one every morning. The

Gillette Safety Razor

makes shaving

so easy that you never feel like putting it off—

so quick that you can always spare the time (it takes but three minutes)—

so comfortable that you will wonder how you ever put up with any other razor.

Every Gillette Set includes 12 Blades (24 of the keenest edges ever made.) Standard Sets \$5.00—Pocket Editions \$5.00 to \$6.00—Combination Sets \$6.50 up.

Monday:—French Club—Oratory Contest. Gymnasium. Tuesday:—Mock Parliament. Swimming. Boxing. Wrestling.

WHAT IS COMING.

Whitney Warren, at the recent New York horse show, nodded toward a young man in tight morning coat and rakishly tilted top hat, and said: "That young millionaire has already had three wives. Yet he is received, yet he is even lionized everywhere. What is the world coming to?" "What is the world coming to?" Mr. Warren pursued. "As I look about me at the tolerant, the too tolerant society of to-day, I think of the horse thief. 'You're a very serious crime, my man,' a judge said sternly to a horse thief. 'Fifty years ago it was a hanging matter.' 'Well, your honor,' said the horse thief calmly, 'fifty years hence it may not be a crime at all.'"

FIRING HIGH.

Bishop Boyd Carpenter, as reported in The London Times: "Instead of saying to the children: 'You should not do this or that,' they should say, 'You should keep the whole of that great organism with its delicate forces, physical, moral, and intellectual, in such a state of healthful activity that they shall be combined in your own individuality in such sort as to be real powers for good through the whole length of your days.'"

ACCOMMODATING.

Hereafter the street lights will be turned off at 10 o'clock at night. If there is any person expected to return home by late train nor any public gathering the lights will be left burning until a later hour if such notice be given central at telephone office.—Rolling Prairie (Ind.), "Record."

Mabel Hackney as "Helene" in "The Typhoon."

On account of the cancellation of the Union Dance, many downtown theatres did business last night.
